BOOTS TO WORKWEAR

In 1982 the Magnum brand was born in the USA manufacturing footwear for the FBI training facility in Virginia. Since that day Magnum has been regarded as a leader in uniform footwear offering technology, innovation and performance footwear. Drawing upon our 35 years of knowledge and technical innovation we have combined this with a specialty workwear design team bringing 25 years of industry knowledge. Our aim was to engineer and design one of the most technically innovative everyday workwear ranges that would change the way you think about workwear clothing.

GUESS WHAT? WE DID IT – MAGNUM - GREATER STRENGTH

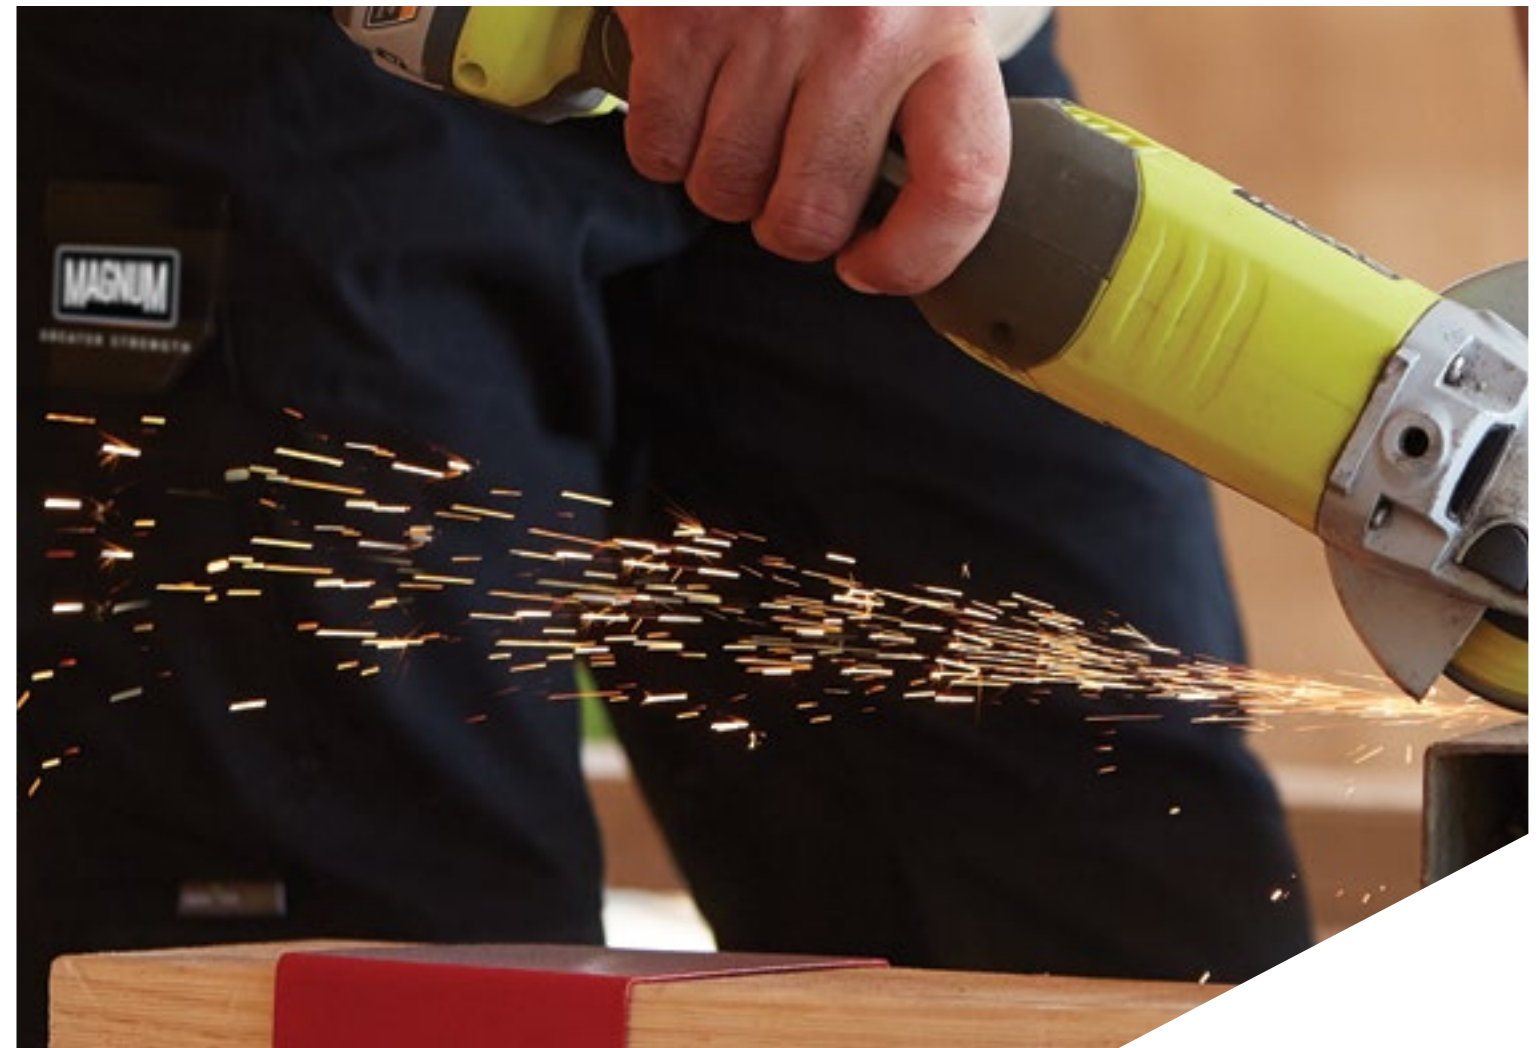

Magnum is constantly evolving to offer our consumers superior protection solutions. Our latest display of this is our collaboration with Nanotex in developing the i-shield technology for workwear apparel. This advanced technology provides

THE ULTIMATE IN CLOTHING PROTECTION.

It is a method that impregnates the fibres down to a microscopic level at the point of milling. This creates a breathable hydrophobic fabric that protects the user from water, liquid, oil and dirt protecting the user for longer wear.
